Jagenberg Group at the Battery Show Europe 2025
Technology that moves the energy market

Stuttgart, June 3-5, 2025 - Hall 10, Stand E46

Jagenberg Group invites you to the Battery Show Europe 2025 - Europe's leading trade fair for battery and e-mobility technologies. Under the motto ***"Create.Future.Together."*** *the Group will be presenting its combined expertise for sophisticated roll-to-roll processes in battery production at the Stuttgart exhibition center.*

The trade fair presentation will focus on customized solutions for processing anode and cathode materials - from coating and calendering to precise cutting, winding and drying. Visitors will gain insights into state-of-the-art technologies designed for efficiency, precision and automation - ready for the challenges of electromobility and energy storage of tomorrow.

Three strong companies - one joint appearance
Three Jagenberg Group companies are joining forces at the joint stand:

- *Kampf GmbH*
- *Kampf LSF GmbH & Co. KG*
- *Jagenberg Converting Solutions GmbH*

Kampf & Kampf LSF: Slitting and winding to perfection
With the machines on show - including the EvoSlitter, TechSlitter CHRO, the MicroSlitter, the TechWinder and the BSF Slitter - Kampf and Kampf LSF are presenting their next-level technology for processing highly sensitive electrode and separator foils. Sophisticated inspection systems, a modular design and versatile automation options enable maximum efficiency, precision, process reliability and integration capability - ideal for scalable battery cell production.

Create.Future.Together.

Jagenberg Converting Solutions: Complete solutions for the energy market
"Plug and Produce" - this is the motto under which Jagenberg Converting Solutions demonstrates its expertise in complete turnkey systems. The highlight is the Triplex DryStar dryer, supplemented by the company's own slot die technology, precise mass feeding systems and innovative calender technology. JCS serves the entire process chain - from the pilot line to large-scale production - and offers maximum flexibility through scalable system solutions.

VDMA Innovation Tour: stop at the Jagenberg Group
The Jagenberg Group is part of the official VDMA Battery Tour, which presents selected innovation drivers in the industry during the trade fair. The stop at the Jagenberg Group stand recognizes the Group's commitment to sustainable, networked and future-proof manufacturing solutions in Europe.

The Jagenberg Group's membership of the Battery Tech Alliance network will also be visible at the stand - a sign of its active involvement in a strong ecosystem of technology partners along the entire battery value chain.

Shaping innovation together
"When we develop solutions for the energy sector, we think holistically," explains Dr. Stephan Witt, Executive Board of Jagenberg AG. "Our strength lies in the combination of experience, innovative power and partnership-based cooperation - within the Group and with our customers. The Battery Show is the ideal place to demonstrate precisely this approach."

About Jagenberg AG
Jagenberg AG, part of the Krefeld-based Kleinewefers Group, acts as a management holding company for the Jagenberg Group's operating subsidiaries, which employ around 1,500 people in Europe, China, India and the USA. In addition to the Jagenberg Group's industrial holdings, the Kleinewefers Group has a second business division, the real estate division. www.jagenberg.com
